

Scottish Engineering Lean Six Sigma Club
Sharing Best Practice since 2001

Presentation: **Factory Design & Layout (FDL) At Rolls Royce Marine**

Speaker: **Jim Duthie, Rolls-Royce**

Venue: Scottish Engineering, 105 West George Street, Glasgow, G2 1QL

Date: Tuesday, **10 May 2005**

Time: 1:30pm arrival and buffet for **2:00pm start** - 3:30pm

Synopsis

Rolls Royce Marine in Dalgety Bay manufactures and services marine motion control equipment.

Rolls Royce has developed a series of Best Practice modules known as the Rolls Royce Production System. Jim will be sharing his experiences of deploying the Factory Design & Layout module.

The presentation will describe the successes and challenges in implementing Lean and Six Sigma principles in a low volume manufacturing environment.

Non-members are welcome!

Please note that number of attendees is limited up to 30 per session and 3 per plant. Places are booked on first-come-first-serve basis, please confirm your attendance to:
