

Commercial Lighting

Cost saving, energy efficient, carbon reducing **Intelligent Hybrid Lighting Platform** powered by reusable wind and solar energy

Communication

Wireless, SIM, 5G devices

Smart City

- Internet of Things in a Smart City
- Smart parking

Utility Power

Supplemental Power using meshing technology and intelligent management software

Surveillance

- Rapid Deployment Security Tower
- High definition CCTV

Analytics

Monitoring pollution, speed etc. using intelligent sensors

Emergency Alert

Help Points/ Early warning system

Natural Disasters

Off-grid Emergency lighting and power in event of natural disasters (floods, earthquakes, Covid-19)
